21 CYBERSECURITY TWITTER ACCOUNTS YOU SHOULD BE FOLLOWING

(https://www.sentinelone.com/blog/21-cybersecurity-twitter-accounts-you-should-follow/)

"Florian is a redteamer, pentester and exploit hunter, as well prolific tweeter and blogger. @HanseSecure is one of the best sources for tweets and retweets of technical write-ups, links to scripts, plug-ins, exploit kits and other new tools, along with how-to's and tips for anyone interested in redteaming and pentesting."

Modern red teaming: 21 resources for your security team

(https://techbeacon.com/security/modern-red-teaming-21-resources-your-security-team)

"Hansemann is an ethical hacker and penetration tester. His tweets and blog focus on tools and techniques of interest to red team members. For example, he covers Tokenvator—a tool to elevate privilege with Windows tokens—and how to write a payload for process injection in Windows."

2. QuickFails

der meisten Unternehmen bei Penetrationstests

#1 Wir brauchen Office-Macros.

#2 Nimm den Admin-Account, geht schneller.

#3 Ja, wir haben eine Firewall.

#4 Liegt auf der Netzwerkfreigabe.
